Book Descriptions:

We have made it easy for you to find a PDF Ebooks without any digging. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with braun 5510 manual . To get started finding braun 5510 manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

braun 5510 manual

Please check your inbox, and if you can't find it, check your spam folder to make sure it didn't end up there. Please also check your spam folder. I am enjoying posting things I have learned and done since I got my first. It is possible to use the shaver with the AC cord normally used for charging. I wanted to replace the NiCad AA batteries with new cells. Add Tip Ask Question Comment Download Step 1 Opening the Case The first problem is how to open the case of the shaver. This graphic from the shavers manual gives some description. But, these instructions assume you will no longer use the shaver after opening to remove the old batteries for recycling. The seal is green as shown. Use a larger coin to push and break the seal. Then rotate the round fitting where the cord attaches counterclockwise about 45 degrees. Rotating this cord jack fitting required considerable force. I had to grasp a US quarter dollar with a pair of pliers to apply enough force. Add Tip Ask Question Comment Download Step 2 More on Opening the Case In MS Paint I added some colored lines to illustrate the steps in opening the case. As described in the previous step, rotate the fitting around the charging cord jack counterclockwise red arrow. There is an end cap on the case as shown by the yellow lines. When the fitting around the cord jack has been rotated, the end cap slides off yellow arrows. Then the major portion of the case slides away from the inner workings of the shaver green arrows. Pry it open only as far as needed at the end of the shaver shown in the photo. Slide the inner case for the circuit board and motor out of the shaver. Add Tip Ask Question Comment Download Step 3 Inner Case Catches The inner case around the circuit board is an upper piece of translucent plastic. The lower piece is black plastic. Four snaps hold the two pieces together. Gently pry each off of its hook. The graphic illustrates the hook catches. <http://ecohouse-lab.com/userfiles/craftsman-1-2-hp-garage-door-opener-user-manual.xml>

- **braun 5510 manual, braun 5513 manual, braun 5510 manual download, braun 5510 manual pdf, braun 5510 manual instructions, braun 5510 manual downloads, braun 5520 manual, braun 5513 manual, braun 5517 manual.**

Add Tip Ask Question Comment Download Step 4 The Cells The photo shows one of the original cells. Metal tabs spot welded to the ends of the cells protrude through slots in the circuit board and are soldered in place. It is easy to become confused. I decided to use some bare stranded wire. I pushed it through the slots in the circuit board and soldered an end to the circuit board. Then I cut it to length to reach the point of contact on the cell ends. I roughed up the ends of the cells with sandpaper and tinned them with solder. I soldered the cells to the wire pieces. Add Tip Ask Question Comment Download Step 5 Assembly Braun builds a poison pill into its shavers so you cannot assemble the shaver after replacing the batteries. Working around that poison pill is the second important thing in this Instructable, after how to get the case open. You can see that I tried chewing up the cord jack fitting with a Dremel tool and cutter bit. It is not necessary and does not work, anyway. Add Tip Ask Question Comment Download Step 6 The Poison Pill Braun uses two metal pins like the one shown below to fall into place and lock the cord jack fitting so it cannot be rotated clockwise back to its original position after the seal has been broken and the shaver has been opened. This pin is shown vastly enlarged. The actual pins are only about one quarter inch in length in all. As long as the cord jack fitting cannot be rotated back to its original position, the charging cord cannot be used with the shaver. These pins need to be removed, but they are hidden from view. Add Tip Ask Question Comment Download Step 7 Removing the Locking Pins In the graphic you will recognize the cord jack fitting black face with grey contrasting color to highlight the three dimensional aspect of the graphic. The two pins are inside the cord jack fitting where you see the

red dots. It is actually grey, but I wanted its color to contrast with the rest of the graphic. <https://www.freeunlocks.com/uploads/craftsman-1-2-hp-owner-s-manual.xml>

The pointed ends are inside pockets made of translucent plastic. With a drill bit or a jewelers screwdriver push the pointed ends toward each other to release the piece. Then slide it away from the assembly arrows with feathered back ends. The cord jack fitting can now be lifted out very easily. The locking pins will likely fall out while you are removing the cord jack fitting. Discard them. You can now rotate the cord jack fitting in either direction as needed. Add Tip Ask Question Comment Download Step 8 Assemble the Shaver and Charge I could not get the cord jack fitting to engage so that it also locked the parts of the case to keep the case from sliding and opening when I applied pressure to the shavers sliding switch. It should work, but it did not for me. So, I drilled a hole in the side of the shaver and inserted a short screw to keep the parts from sliding away from each other. My screw hole came to be larger than I wanted it to be, so I filled the hole with hot glue and pushed the screw into the hot glue. It looks ugly, but it works. Add Tip Ask Question Comment Download Step 9 Attaching the End Cap Again The end cap also did not want to stay in place, since I could not get the cord jack fitting to lock the parts of the case. So, I ran a small bead of hot glue on the front and back of the shaver and pushed the end cap into place. Add Tip Ask Question Comment Download Share it with us! I Made It! Recommendations Artists Popsicle Stick Puzzle There are a number of models available with different mAh ratings. I'm just curious if that makes a difference to the shaver firmware, as the higher the mAh rating the longer the charge. Braun probably did not use the highest mAh rated batteries as OEM, to save on cost. I'm wondering if 2200mAh cells 2.4v combined would be a good replacement. What do you think I think the 2200 mAh cells you mentioned would work. I did not see any chipsets inside my shaver 1990 vintage, which would be necessary for any firmware.

It was immediately after doing this project that I went to replace the NiCad cells and learned they were no longer in stores available to me Radio Shack, Batteries Plus. The folks at Batteries Plus suggested simply using NiMH cells as substitutes for NiCad cells. That surprised me, based on what I had read up to the present. I have not tried it yet, though. Thanks for your comment. 0 modelflyer Phil B These covers can be accessed using a knife either side of the bottom cover, just press the knife in and pop them off. Now all I need are the new batteries and the value of that blown resistor on the circuit board. PS you can use NiCads to replace NiMH cells but it's not a good idea the other way as the peak voltage on the NiMH cell is different and the charge circuit may not cut off. 0 xevious Phil B The 6000 series on up has firmware to regulate various things, and to run the LCD when present. I just learned that someone used a set of 1650 mAh NiMH 1.2v batteries in their shaver and they worked out fine. I'm going to go with the 2200 mAh ones; it'll be interesting if the shaving time is extended between charges over OEM performance. Maybe I'll do a writeup of replacing the cells in the 7000 series. 0 Phil B xevious I would be interested if the process for opening the case and removing any poison pills that might prevent battery replacement by the owner has changed. I hope something in my Instructable will be useful to you. 0 xevious Phil B Braun must have done away with those on later models, as I opened up my 7526 and 8595 shavers, disassembled, cleaned whisker debris out of the casing, then reassembled with success both shavers still work. I've got a spare shaver model 7526 that has well worn batteries, which will be the tester for this battery replacement. If it works well, I'm going to replace the cells in my other Braun shavers. Higher mAh rating means longer life. The new cells I'll be putting in are rated at 2300mAh still 1.

<https://www.becompta.be/emploi/4-axis-cnc-stepper-motor-ta8435h-driver-board-manual>

2V and can take up to 1000 cycles versus the usual 500 on the generic NiMH AA cells. 0 xevious xevious My attempt to use 2200mAh and higher batteries failed miserably. The additional storage capability of the batteries seems to confuse the shaver firmware. As I had suspected might be the

case, it is tuned to deal with a specific battery capacity. So, its important to use batteries that are as close to the originals as possible. I believe the originals were more like 1400mAh or 1500mAh. 1650mAh is probably on the edge of tolerance for the shaver, and it probably doesnt give much more shaving time than a 1500mAh battery. Id say its best to stick as close to the original specs as possible. 0 Phil B xevious Will you try again with different batteries 0 xevious Phil B Ive had other projects that have taken priority, and I picked up another used shaver on the cheap with batteries still working well. So, itll be easier to do the battery swap, as any failure wont leave me without a working shaver. 0 xevious xevious My old 7500 series shaver just wouldnt work properly with the replacement batteries. I think the introduction of the 2200mAh batteries must have caused some kind of damage. Not sure what that would have been, perhaps a dependent capacitor external to the processor. In any case, I eventually decided to junk it. Im using an 8995 and a 760 now and.I found this thread and see that you saw you successfully opened your 7526.Before the batteries did not hold a charge anymore and I had ot use it plugged in, but now it is like a speed racer. I read elsewhere the original batteries were 1100 mAh on the 7526, but the max.Be sure to get the batteries with Soldertabs attached much easier. Good Luck! 0 xevious pmiller10 The bottom socket surround is rectangular, with a protrusion in the center where you insert the cord. You then apply pressure to pry the surround off. There are 4 little hooks that hold the surround on, pointing to the front and back panels of the shaver.

<https://cocoonproperty.com/images/8-hp-tecumseh-engine-manual.pdf>

So you want to pry in that direction for easier removal. Good luck! 0 xevious Phil B I detached the old cells from their tabs, installed the new ones, soldered the tabs to the cells, did a circuit check to be sure the contact is good, reassembled the shaver, then tested it out. The shaver actually worked, but the battery level was lowclearly they needed to be charged. So, I plugged in the shaver and let it go through a charging cycle 60 minutes. When the flashing light went off, I disengaged the shaver from the cord, then tried to operate it. DEAD. I plugged it back in and tried to run the shaver, and it did work. It just wont run off the cells. I double checked the circuit again and it showed OKthe batteries are fully charged. I suspect that something must have gone wrong on the circuit board. The only thing I can think of is that it isnt designed to handle a 1.2v battery that has a 2300mAh rating. I quite sure I didnt introduce any issues directly e.g. short or broken circuit. 0 xevious xevious I determined that my soldered connections were faulty. I didnt have proper solder for the job too small a wire and too quickly curing flux and my extreme caution against heating up the batteries caused poor soldered connections. So, I used adhesive backed aluminum tape to secure the leads this time. It works! The higher mAh rating seems to be confusing the firmware, as the low battery light is flashing on the shaver, but its running very strong. Itll be interesting to see how much run time I get on a full charge. 0 Phil B xevious I have heard of poor solder joints acting like a diode. I would not have expected quite the problems you had. I did not worry too much about overheating the batteries. Roughing the battery ends up with sandpaper and tinning them before soldering the wires to the battery ends worked very well. 0 batvette Phil B Im afraid to pop and break off the wrong panel. I did that one too many times with my cars and stereos.

<http://libertad74.com/images/8-hp-honda-engine-manual.pdf>

I have removed the 2 screws holding the swivel blade holder but nothing. Regards, Arohl Braun 1.pdf Braun 2.pdf Braun 3.pdf 0 arohl88 I still cant figure out how to open it. Do you have a service manual or instructions for it Arohl Could there be catches like I described in step 3 It has been a long time since I took my shaver apart and I do not remember as much as I would like about it. Weve strived to bring new life into the industry by making quality, fashionable watches and accessories that are both fun and accessible.

Multifunction Quartz movement typically built into three separate subeyes for the day of the week, date of the month and 24hour time. Chronograph A multifunction watch with stopwatch functionality. We've spent decades perfecting our craft and creating watches that you'll love to wear and collect. Stainless steel watch bracelets are extremely durable and can last the lifetime of a watch if properly maintained. We offer free watch adjustments in our Fossil Retail and Outlet Stores. Silicone watch straps are waterproof and very comfortable to wear. Our quick release pins allow you to change up your look as often as you like while maintaining your signature style. Round stainless steel case with black coating. Adjustable brown luggage leather strap with contrast stitching. Singleprong buckle closure. Threehand analog quartz movement. Black satin with matte finish dial face features Arabic numerals, stick index hour markers, date display window at 6clock, minute track at perimeter, and brand name. Presentation box included. Imported. Measurements If this product is sold by another party, please contact the seller directly for warranty information for this product. You may also be able to find warranty information on the manufacturer's website. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Im on my third or fourth Fossil watch. I cant exactly remember because they last so long. I just take them

and have a new batterie put in every couple of years. My last one before the one Im wearing now still works, I was just ready for a new style. What I like about this watch and the ones I buy for myself, is that the band goes under the watch. My skin does funny things when metal is against it.

The leather bands that go all the way around mitigate this. The face is easy to read with only time and date complications. I would describe the watch as minimalist, meaning it has fewer features to eventually go wrong or require calibration. I write this review after owning the watch for 3 days. I will update this review as soon as I notice any significant scratches. Have gotten several compliments on the watch. Can be worn with casual or formal attire. No me gusto que hubo retraso en la entrega aunque me lo informaron. Hes very difficult to buy for and has a number of watches. I selected this as it has a brown strap and a larger watch face. He loved it. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Worth the price. Sorry, we failed to record your vote.
